# Counselling & Therapy

There are many types of counselling and therapy available. Some are private, some are covered by the NHS, and many are provided by charities.

If you are struggling with your mental health in any way, it's always best to go and talk to your GP about your symptoms so they can point you in the right direction. They may refer you to an organisation, therapy or counselling service if they think it's an effective form of treatment. This page touches upon the options you may come across.

You can use this information as a starting point.
