Understanding Your Role in Care Training

For more information, visit our Understanding Your Role in Care Training webpage.

COURSE CONTENTS

This training course is broken down into 3 sections

1. Understand Your Role
2. Rights and Responsibilities
3. Works Well With Others

LEARNING OUTCOMES

- Understand your role in care and your responsibilities to patients
- Learn about the importance of working relationships in your role
- Learn about how to work with others in your role

ABOUT THIS COURSE

Our **Understanding Your Role Training** course aims to provide awareness to help make sure employees know what is expected from them in their job role but also what is not included in your role. Job descriptions will give a good overview of your role but will often not list every task that is expected from you.

The possible responsibilities that might be included in your job role are: **providing care & support**, working as part of a team, **contributing towards activities** or respecting confidentiality. As an employee, it is important to understand your companies values, aims and objectives.

Standard 1 of the Care Certificate - Understanding your role - requires staff to:

- Understand their own role
- Work in ways that have been agreed between them and their employer
- Understand working relationships in health & social care
- Work in partnership with others

This course works in partnership with our **14 other awareness courses** that make up the Care Certificate.

You can access our free worksheet that has been designed to accompany our online Understanding Your Role Training course. In each section, there is a box for you to
tick when you have watched the relevant slide in our course. You can also take notes that will help you during your practical assessment at work.

This course equips learners with the knowledge that's required to be put into practice in the workplace, whereby they can do the 'practical' part of their training, followed by having the Care Certificate supplied to them by their management as they meet the required standards. These courses provide part of training but practical training is still required to obtain the care certificate.
